MIZRACHI MOVEMENT IN GALICIA.

A conference of the leading Mizra-chi members and workers was recently held at Cracow for the purpose of devising plans how to spread the Mizrachi idea in that section of Poland. As a result of the Conference, a committee was appointed whose functions are to organize Mizrachi Societies in the various cities of Western Galicia and ultimately to call a General Conference of Mizrachi representatives in that territory.

LONGHORNS BRINGS IN 30,000,000 GASSER

One of the recently organized companies in Fort Worth which is attracting much attention is the Longhorn Drilling and Development Association. This new Richmond in the field owns six strings of drilling tools, which are rapidly being sent to the Ranger and Desdemona fields, where they have contracted to drill twenty-five wells for one of the largest companies operating in these well known fields. In addition to drilling oil wells, the Longhorn Company has a lease on a forty-acre tract known as the D. Ernest lease, about eight miles south of Ranger, midway between the Ranger and Desdemona fields. On this forty-acre tract the Longhorn company has a derrick up and a vast number of feet of casing together with a large tank and pumps.

They have a well down 865 feet, which is the surprise of that section. Without warning, the well began to blow off gas which is heard for several miles. This big gasser is one mile northwest of the Ranger-Duke Oil company well now being drilled on J. W. Blackwell tract.

The great gas well is being visited by people from both the Ranger and Desdemona fields to witness how a well producing 30,000,000 feet of natural gas every 24 hours acts.

The Longhorn Company will preserve this production of gas to supply surrounding oil companies with fuel and steps are being considered to pipe the gas to Fort Worth.
